## Empire Console Room Heater

When serious heat at a value price is your primary objective, a console room heater from Dixie will meet your needs! Propane room heaters are an ideal replacement for traditional wood, coal or kerosene stoves and will heat a space quickly, safely and economically - at less than half the cost of electricity. Just like traditional stoves, propane room heaters use room air for combustion and a vent pipe connects to a chimney or flue to exhaust outside. But unlike traditional stoves, a propane room heater is convenient, clean and odorless.

This heater is equipped with a hydraulic thermostat and a blower for consistent, controlled heat. Even without the blower, it will keep heating your home during power outages. Empire room heaters are simple to operate, quiet and reliable. No matter what kind of space you need to heat, a propane heater from Dixie will keep you warm!

SINCE 1932

# Empire Console Room Heater

Heat large areas quickly, safely and economically with Empire's vented console room heater. Radiant and convection heat circulate warmth while the blower places warm air at floor level to give "barefoot" comfort throughout the winter season. Housed in a metal, textured, powder coated cabinet, this room heater is as durable as it is effective.

Empire vented room heaters are designed for quiet operation. The curved combustion chamber minimizes noise while the burner ignites the gas immediately as it enters the burner port for added efficiency. The automatic blower cycles on and off with the heater. A simple and reliable piezo ignition system lights the pilot without matches. The hydraulic thermostat allows for a wide range of temperature settings and needs no outside electricity assuring reliable round-the clock-comfort.

Conventional or Type B Vent technology utilizes an existing chimney or conventional vent, which makes the room heater an ideal replacement for your old wood, coal or kerosene stove. A vent safety switch is included that automatically shuts off the heater if it is not venting properly. The draft diverter may be rotated for horizontal or vertical installations. Floor pads are not required on hard floors, but are recommended for placement on carpet.

## Features

- Manufactured by Empire
- Ideal for large sized rooms
- Hydraulic thermostat
- Safety Pilot with pushbutton ignitor
- Vent safety switch
- Made to ANSI standards in the USA
- 10-year limited warranty on combustion chamber; 1-year limited warranty on all other parts
