Empire SR10 Radiant Heater

Add warmth easily and economically with a propane heater from Dixie. Ideal for utility rooms, garages, out buildings and hunting cabins, these vent free heaters will heat your space quickly, safely and efficiently at less than half the cost of electricity.

Because they don't require outside venting, utility heaters can be installed almost anywhere. They are 99.9% fuel efficient to warm your space without taxing your wallet. Choose from Blue Flame or Radiant types, both of which are available in several sizes. Blue Flame heaters work by heating the air, surrounding people and objects with "atmospheric" warmth. Radiant heaters produce infrared "radiant" heat that adds warmth directly to people and objects, like the sun shining through a window.

All units are thermostatically controlled, easy to operate and whisper-quiet. Also, these heaters remain functional during power outages, since they do not require electricity. No matter what kind of space you need to heat, a propane heater from Dixie will keep you warm!

Empire SR10 Radiant Heater

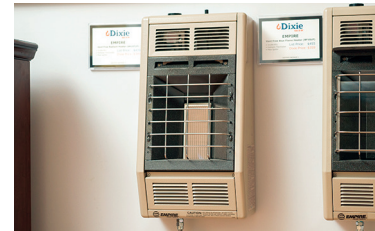

The Empire SR10 is a Radiant heater that produces infrared heat, warming people and objects in the room – at less than half the cost of electricity. The integrated hydraulic thermostat automatically cycles the unit from full to pilot when room temperature is satisfied. Empire heaters are whisper quiet and use a state-of-the-art powder coat process that produces a durable, scratch resistant finish.

Empire vent-free heaters offer convenient, easy to operate controls on top of the unit. The pushbutton ignitor lights the pilot, eliminating the need for matches. An Oxygen Depletion Sensing (ODS) system is included to turn off the flame should room oxygen levels become unsafe. All Empire heaters are designed, tested and approved to ANSI standards and made in the USA.

Vent free technology provides 99.9% efficiency and eliminates the need for venting, greatly simplifying installation. This gas heater does not require electricity and, in the event of a power outage, will keep you warm and cozy.

Features

- Manufactured by Empire
- Powder coat finish
- Safety Pilot with pushbutton ignitor
- Hydraulic thermostat
- Oxygen Depletion Sensing (ODS) safety system
- Made to ANSI standards in the USA
- 5-year limited warranty
